

The new Grumbach SLIM-BLOCK: Discover whole new possibilities in WC-Installation!

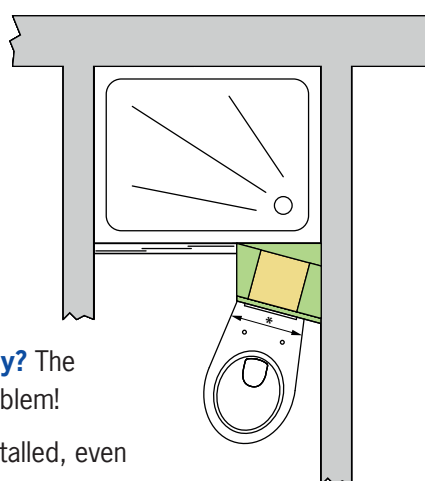

Sanitary blocks

There is actually no more space next to the downpipe – the Grumbach SLIM-BLOCK allows the mounting of a WC, nevertheless!

Is there a **downpipe** or a **support** in the way? A **stack** or **chimney**? The “hose bathroom” should be used efficiently? That’s no longer a problem!

With the new Grumbach SLIM-BLOCK, wall-hanging-WCs can be installed, even in particularly tight spaces!

The 15°-angle elements of the SLIM-BLOCK allow efficient use of smaller layouts with the installation of a wall-hanging-WC.

Installation example
see page 40!

Flush panels for the Grumbach SLIM-BLOCK

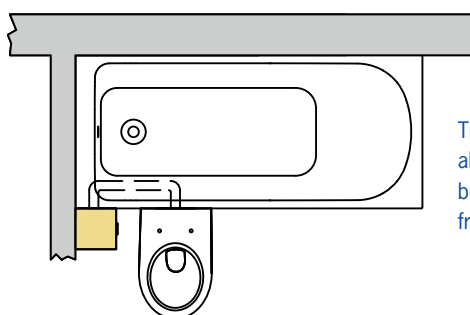

Omega 20

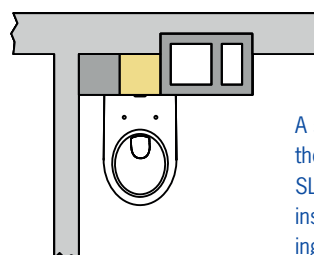

Omega 30

- **Note:** When using the "Omega 60" flush panel, the cladding on the block must be at least 24 mm thick!

Entirely new possibilities are presented for the installation of WC systems when working with the Grumbach "SLIM-BLOCK"

The Grumbach SLIM-BLOCK allow special solutions to be found, e.g. for WC in front of the bathtub

A stack or a chimney is in the way – the Grumbach SLIM-BLOCK still makes the installation of a wall-hanging WC possible!
