■ Attica Plug-in Overflow
The clever two-in-one solution!
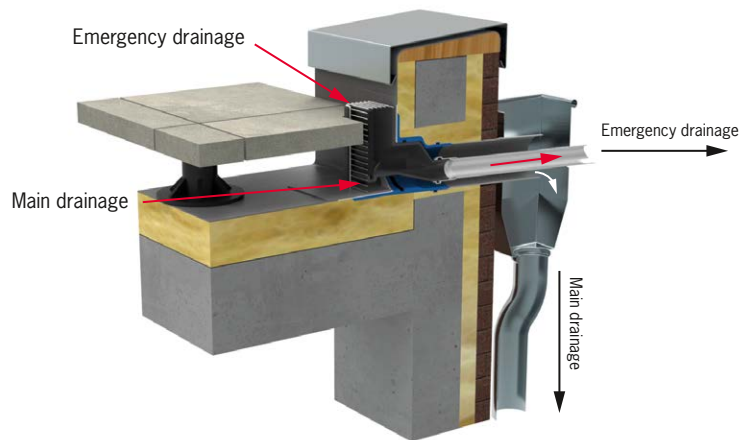

2 in 1

Attica plug-in overflow

Attica plug-in overflow

Ideally suitable for the Grumbach attica balcony drain made of PUR DN 100 with plug-in sleeve (Art.-No. 3415 or 3444.BIT). The plug-in overflow allows main and emergency drainage with only one attica borehole.
The emergency overflow can simply be adapted. The slip-in overflow is suitable for Attikas up to 350 mm and can be shortened and extended without any problems.

Best for small balconies and terraces!

Installation example

Attica plug-in overflow in a attica balcony drain in conjunction with a water collecting box

Attica plug-in overflow in a attica balcony drain with partial flow diversion made of stainless steel (for direct downpipe connection).

Pebble trap grate for main and emergency drainage, made of high-quality stainless steel

Overflow shutter with cut edges/perforations for simple adaption to the requred emergency overflow

Overflow element made of polyurethane hard foam (PUR), can be shortened as required

Example: Attica plug-in overflow in the attica balcony drain with partial flow diversion made of stainless steel (for direct downpipe connection)

Example: Attica plug-in overflow applied to a attica balcony drain

Assembly of a plug-in overflow

Quick and simple mounting of the plug-in overflow

1. Push the plug-in overflow into the attica balcony drain
2. Shorten overflow shutter to the required overflow height and push it into the guiding rail
3. Add pebble trap grate
4. Completely assembled plug-in overflow
5. The PP sleeve pipe or stainless steel pipe protrudes from the water collection box.
