

# ■ Reach-through Element

## Keeping an eye on the insulation

Reach-through element DN 125 with rubber cap and clamp

### Reach-through element made of PUR

This allows you to keep access to your insulation.

- Easily accessible revision opening for checking insulation – **now with larger diameter!**
- Made of high-quality, CFC-free PUR integral hard foam
- With firmly cast-on connection sleeve, available to fit all common roofing membranes (please specify roofing membrane type when ordering).
- With removable rubber cap and clamp
- Long design for bridging e.g. green roof structures
- Can be shortened as required
- Ideal for checking the thermal insulation
- Suitable filling-/insulation element made of EPS available
